## New HEDIS Measure Depression Screening and Follow-up for Adolescents and Adults (DSF)

Annually, members aged 12 years and older need to be screened for clinical depression using a standardized tool. CHG is recommending using the standardized depression screening tool, **PHQ-2**.

As a reminder, if a member tests positive (score greater than 3) for the depression screening, we recommend for these members to be referred directly to Community Health Group's Behavioral Health Services Department at (800) 404-3332.

Community Health Group members with a serious mental health condition are covered by the County Mental Health Plan. If you suspect a Community Health Group member has a serious mental health condition please refer them to the San Diego County Access & Crisis Line at (888) 724-7240.

**To receive credit for this screening and follow-up care, please submit a claim with the appropriate billing code(s).**

Depression Screening codes	
Description	HCPC
Screening for depression is documented as <b>negative</b> , a follow-up plan is not required	G8510
Screening for depression is documented as being <b>positive</b> and a follow-up plan <u>is documented</u> .	G8431
