

July 2019

Pharmacy Profile Is Now Available

We are pleased to announce that we have launched a new tool through the CHG Provider Portal today! This tool is designed to enable you to view, export, and save the medication (pharmacy) history for your patients.

This tool will help you manage the care you provide our members, your patients. It provides a comprehensive list of all the member's medication history for the past 90 days, 180 days, and one year. The medication list includes all medications dispensed from all providers, not just from the PCP.

In addition, this tool can help improve your HEDIS scores. Below are some examples:

- Identify how many times your patient has been dispensed an asthma rescue and/or controller medication (Asthma Medication Ratio).
- Confirm if your patient has picked up their diabetic medication/supplies (Comprehensive Diabetes Care).

The medication profile section contains the following fields:

- Date of service
- National Drug Code (NDC)
- Drug name
- Days Supply
- Quantity Dispensed
- Prescriber Name

How to access this information

1. The tool is located under the **PROVIDERS** section in the CHG Provider Portal.
2. Select **MEMBER ELIGIBILITY STATUS**.
3. Perform a member search by entering members CIN, Name, or CHG subscriber ID and click search
